[github-nivandanadikeshi](https://github.com/nivandanadikeshi)

I am a dedicated and enthusiastic graduated Software Engineer with a strong foundation in full-stack development, object-oriented programming, software design principles, OOP and SDLC skills. I have hands-on experience working as a Software Engineer on projects such as customer experience stock management system and HR management system.

EXPERIENCE

Trainee Software Engineer (Oct 2024- Apr 2025)

Centre for Defense Research and Development Ministry of Defense

- Adept at writing high-quality, efficient, and maintainable code using PHP(Laravel), JavaScript, and Python, with expertise in backend development and modern web application architecture.
- Skilled in integrating APIs, managing databases, and connecting external services to create seamless and scalable systems.
- Experienced in implementing authentication, role-based access control, and integrating third-party services.
- Committed in following industry best practices, coding standards, and version control processes to ensure reliability, performance, and long-term maintainability of applications.

EDUCATION

Sri Lanka Technology Campus (2021-2025)
BSc.(Hons.) in Software Engineering (GPA 3.0)

Galahitiyawa Central College (2018-2020)
Advanced Level Examination

Seventh-day Adventist High School (2017)
Ordinary Level Examination

TECHNICAL SKILLS

- **Web Technologies:** HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS, PHP (Laravel), Vite
- **Programming Languages:** Python, Java, C#, Dart
- **.NET Stack:** C#, ASP.NET Core MVC, Windows Forms (.NET), SQL Server
- **Backend & Databases:** MYSQL, Firebase
- **UI/UX Design:** Figma, Material UI
- **Mobile App Development:** Flutter (Dart)
- **Data Visualization & Analytics:** Power BI, Tableau
- **Tools & Platforms:** Git, GitHub, Visual Studio, Android Studio

PROJECTS

Personal Portfolio Website

The project includes a modern, high-performance personal portfolio website with responsive UI, project showcases, professional profile integration, and optimized deployment. (React, TypeScript, Tailwind CSS, Vite)

Natural Disaster Donation Mobile Application

The project includes user authentication, role-based access, real-time disaster alerts, donation tracking, AI-based receipt verification, NGO and admin dashboards, push notifications, and a secure cloud database. (Flutter (Dart), Firebase (Auth, Firestore, Cloud Functions), Gemini AI, Figma)

Stock Management System for Ministry of Defence

The project includes user authentication, role-based access, stock management, inventory tracking, order processing, an analytics dashboard, notifications, and a secure database. (PHP (Laravel), HTML, CSS, JavaScript, MySQL, Figma)

HR Management System for Ministry of Defence

The project includes user authentication, role-based access, secure database, requirement analysis and database design. (PHP (Laravel), HTML, CSS, JavaScript, MySQL, Figma)

University Attendance Management System

The project includes user registration, role-based access, course management, attendance recording, an analytics dashboard, notifications, and a secure database. (ASP.NET Core MVC, C#, HTML, CSS, MySQL)

Expense Manager Web Application

A Web Application that offers individuals and businesses a robust tool for tracking, categorizing, and analyzing financial transactions. (Windows Forms App (.NET), C#, HTML, CSS, SQL)

OTHER SKILLS

Communication Skills:

- English speaking and writing
- Client Walkthroughs & Communication
- Team Collaboration

Project Management:

- Planning and organizing
- Budgeting & Resource Allocation
- Time Management

Software Development

- Web Technologies
- Agile Methodologies
- UI/UX Design

Professional Development

- International Business Strategy
- Data Analysis & Visualization
- Problem-Solving & Analytical Thinking

EXTRA-CURRICULAR ACTIVITIES

IEEE Computer Society SLTC Research University

- Member (2023-2024)
- Content creator of project DevStack- A project dedicated to organizing workshop series focused on web designing technologies and aimed to enhance practical skills among participants.
- Head of content creation team in Career Fest Workshop Series- A career guidance program for the university undergraduates.
- Media Team Member of Quest Workshop Series- Of C programming from beginners' level to master's level.
- OC member of project Codemania V3.0 (overseeing the planning and execution of a hackathon and workshop, fostering innovation and collaboration in software development)
- Participated in Codemania V3.0 and V4.0 (Python Hackathon)

Media Club SLTC Research University

- Content team member of project Master Designer - A workshop series dedicated to enhance Photoshop skills. The goal was to empower participants with practical knowledge and creative techniques in digital design and image editing.
